Janice Wang

# Leading the Emerging Clean Energy Economy & the Grid of the Future

- Customers are increasingly seeking choice in how they manage their energy
  - Increased adoption of DERs to achieve cost savings, cleaner energy, conservation, and enhanced reliability
  - Commencement of an era of reinvention in the energy industry to enable these choices and create a clean reliable energy future
- SCE's role: to facilitate this transformation by turning the local power grid into a plug-and-play platform that integrates an ever-growing set of DER technologies that:
  - **Modernizes and reinforces the grid** and its operations to improve reliability and integrates distributed resources and other carbon reducing technologies
  - **Connects DERs to markets** that provide revenue opportunities
  - **Transitions to customer rate designs and DER programs** that better reflect the benefits and costs of distributed resources

# Activities in Support of the Grid of the Future

- Local Capacity Requirements
- Preferred Resources Pilot
- Distributed Resource Plan
- Demand Response Auction Mechanism

# Upcoming Procurement Opportunities

- **Demand Response Auction Mechanism**
  - Launch Date: Tentatively planned for Q1 2017
  - For more details, please go to [on.sce.com/dram](http://on.sce.com/dram)
- **Energy Storage & Distribution Deferral RFO**
  - SCE Webinar: November 1, 2017 (registration required)
  - For more details, please go to <https://sceesdd.accionpower.com>
- To be included in SCE's market notifications of upcoming procurement opportunities, please send your company information to [janice.wang@sce.com](mailto:janice.wang@sce.com)
